

Save on fleet costs with a 9-Month Buy-Back

Reduce the cost of your fleet with a shorter, easier to manage vehicle option available on owned and leased vehicles.

The **9-Month Buy-Back** option by Smartfleet provides a unique alternative to standard operating leases and fleet ownership for not-for-profit organisations. You'll minimise depreciation and maintenance expenses, saving significantly on lease and running costs.

- Available under owned or leased vehicles
- Low admin – vehicle sourcing and paperwork is done for you
- Provides staff with new vehicles every nine months or 15,000km
- Latest model vehicles help you to maintain the highest safety standards and lowest fuel consumption
- Ideal for passenger vehicles with low fit-out requirements.

Competitive pricing

Thanks to our fleet-buying power, your new lease begins with a deep discount that saves your organisation thousands on the purchase price of vehicles.

Significantly reduce overall vehicle costs

Maintenance costs remain under manufacturer's warranty throughout the lease term, and vehicles are handed back before the first service is due. Vehicles are returned before any tyres are due for replacement. This significantly reduces the overall cost of the vehicle to your organisation.

Seamless changeover – drive in, drive out

Smartfleet sources your new vehicles and organises any required finance. The vehicle is delivered to your drivers at the same time as the previous vehicle is collected.

Take the pressure off your cash flow with an operating lease

Simplify your fleet expenditure and reduce asset risk while retaining flexibility.

An **operating lease** is a finance option that allows you to both meet demand and simplify fleet finances. With Smartfleet you can:

- Choose the lease term that suits your requirements, from one to five years
- Simplify fleet running costs with a single monthly invoice
- Choose to bundle fixed maintenance costs into your monthly invoice, or establish variable maintenance charging
- Reduce asset risk normally associated with fleet ownership
- Replace the vehicle, extend for a new term or return the vehicle at the end of the lease according to your business needs.

Reduce the need for large financial outlays

A fixed monthly payment replaces the obligation to fund up-front purchases and removes the risk of loss on disposal, providing cash flow benefits.

Finance your fleet according to your needs

Our focus is on tailoring a solution to suit the unique needs of your business, so we'll never lock you into a single finance model.

One fleet, one management plan

Regardless of how much of your fleet is owned or leased, Smartfleet can manage your fleet as one, and customise reports to meet your internal reporting requirements.
