

# Save on the cost of your next car

## The Personal Car Buying Service by Smartfleet is a hassle-free way to shop for, and buy, a car that will save you time and money.

Access expert car buying advice and significant fleet discounts that are usually only available to businesses with the Personal Car Buying Service from Smartfleet.

### How it works

We tap into our 850-strong nationwide dealer network, and ask dealers to compete against each other to submit their best price on your vehicle of choice. We then provide you with at least three of the quotes, with a full breakdown and estimated delivery time.

### What it costs

There is no cost or obligation associated with your initial vehicle search, or to receive your quotes. If you chose to proceed with buying one of the vehicles quoted, there is a small fixed fee of just \$330 including GST.

### Why choose us?

It is simply an easier and cheaper way to buy a car. That's why most people who choose our Personal Car Buying Service have either used us before or have been referred to us by someone who has.

### On top of a great price on your next car, our service includes:

- ✓ Expert advice on car selection
- ✓ Pressure-free test drives
- ✓ Trade-in evaluation
- ✓ Vehicle ordering and paperwork
- ✓ Help organising car finance
- ✓ Vehicle delivered to your door, with a full tank of petrol.
