

Telematics by

Measure it so you can manage it

Deliver better fleet management to meet the demands of your organisation with Telematics by Smartfleet.

Telematics by Smartfleet captures and transmits real-time vehicle data. This accurate and transparent information enables you to optimise your fleet and deliver significant efficiency gains.

Along with being a low-cost, easy-to-use solution, Telematics by Smartfleet provides:

- Enhanced driver safety and convenience
- Easy integration with your fleet operations
- 98% network coverage, delivered via the Telstra network.

For more information:

Enhance employee and vehicle safety

Real-time engine detection warnings and vehicle diagnostics, minimise the risk of unsafe and inconvenient breakdowns. Vehicle location, lone worker protection and driver behaviour monitoring enhance driver safety and support a culture of safer work practices.

Reduce your fleet costs

Full visibility of overall fleet performance, individual vehicles and driver behaviour, makes it easier to identify substantial cost savings in unnecessary fleet asset expenditure, fuel, fringe benefits tax (FBT), theft and vehicle damage, and traffic infringements.

Increase productivity and simplify reporting

Keyless access and paperless, centralised booking for pool vehicles streamlines vehicle-sharing, while the optional ATO-approved e-logbook solution simplifies tracking for business and private trips.

Smarter fleet management is built into Telematics by Smartfleet, with best-of-breed features that enable you to run a more productive, efficient and safe team of vehicles and drivers.

Smartfleet Telematics features

Safety

Driver behaviour alerts

Monitor and manage driving patterns to improve safety and efficiency, such as hard braking, speeding, vehicle roll

Lone worker protection module

Enhance driver safety with in-car duress button and vehicle and driver location

Optional

Low battery and power disconnect alerts

Minimise breakdown risks and response time

Utilisation

Route history playback

View where your vehicles have been to assist with productivity planning

Landmarks and geo-fence

Define geographical boundaries to ensure efficient use of fuel and driver time

Vehicle tracking

Locate in the event of non-response or stolen vehicles

Route frequency

Plan routes and the areas in which drivers work and visit more efficiently

Reporting & Compliance

Notifications

Immediate notifications when alerts are triggered

Fully customisable, self-service reporting

Set-and-save reporting on a wide range of criteria - including real-time and historical, by fleet or per vehicle, and by business segment - and readily access data in easy-to-read report format

Vehicle utilisation

Track which vehicles are currently in use, and identify over- or under-utilised assets

Electronic logbook with in-car display

Supports ATO-approved e-logbook solution for trip purpose

Optional

Technology

Telstra NextG coverage

Fast, reliable network coverage to 98% of the population

Telematics device

Hardwired to capture reliable data, including vehicle performance, and a plug-in option which enables installation use across multiple vehicles.

Remote firmware update

Update remotely and without the need for specialist support
